

Secure World

TrustFA Agent

Secure Kernel

Normal World

Smartphone Application

tz.ko

Legacy OS Kernel

Remote
Services

The diagram illustrates the interaction between a Secure World and a Normal World. The Secure World (left) contains a TrustFA Agent and a Secure Kernel. The Normal World (right) contains a Smartphone Application and a Legacy OS Kernel. A red arrow points from the TrustFA Agent to the tz.ko module within the Legacy OS Kernel. Another red arrow points from the Smartphone Application to the tz.ko module. A third red arrow points from the Smartphone Application to a cloud labeled Remote Services.
